

# WINDOW CILLS

Natural stone window cills and heads for a contemporary look and maintenance free life.

Can be made to order up to 2.7m long. Many different finishes available, sanded the most popular followed by blue honed.

Cills can be punched, combed and grit blasted. Typical leadtime is 3 to 4 weeks.

Cills can be the traditional flat cill, which can be 'kicked up' a few degrees during installation to give a water run off. Also can be sloped or splayed in manufacture.

SANDED CILLS AND HEADS
